## Get only the Sun's Best with Sun Age Control by Lancaster

Rosa Girona - 26/04/2010

Lancaster, the leading name in sun-screen, has recently launched Sun Age Control, a complete line of products that aim to protect the skin and halt premature aging caused by the sun.

These products base their efficiency on protecting and stimulating DNA cell repair. In this manner, the (DNA) cell's "hard drive" is protected, helping to maintain it in perfect condition. The skin's surface is firmly protected by a unique combination of highly photostable UVA/UVB filters and an exclusive antioxidant complex. Sun Age Control's high technology offers a combination of specific ingredients that work in perfect synergy, thereby combating wrinkles, flaccidity and skin blotches that the sun may cause.

### A sun-screen for all ages

According to Lancaster experts, at 30 we do not have the same needs as when we reach 50, yet we share a common interest in showing off perfectly tanned skin without having to worry about the sun's negative effects. To adapt to our needs, Sun Age Control has created special age-based products, whereby protecting the skin from sun becomes a must.

From 35 onwards, a quick tan and heightened protection can be attained with Sun Age Control SPF 15 and SPF 30, Eyes and Lips SPF 30 and After Sun Repair Night Balm. For women over 50, who still want a luminous tan and who worry about the appearance of blotches or their skin lacking firmness, Sun Age Control Mature Skin SPF 30 and Extra Fluid SPF 15 are the perfect way to protect and repair the skin.

Lancaster products can be purchased in Corte Inglés and the finest perfumeries.
