## Barcelona Deluxe innovates with networking sessions

The spectacular shop-museum Bang & Olufsen has served on the Gran Via framework for a newly created event. Barcelona deluxe, along with cosponsors Lutron Mount and made possible a meeting in which participants had the opportunity to meet, exchange views and join forces.

Against a background of economic uncertainty Barcelona deluxe proposed innovation. And what better way than business to business in petit comité. The highest representatives of Artemide, Arboretum, The Barcelona Design Gallery, Point light, Mottura, Lutron, Telespectadors Associats de Catalunya, Working TBO and the Professional Association of Interior Designers of Barcelona were present in the first edition of the conference "Networking deluxe". One event was very productive, given the success, you will soon be repeated.
