Joy and Tranquillity with Les Pop-Ups by Chanel

Rosa Girona - 28/04/2010

Pink, corral and turquoise tones, with slight hints of gold, comprise the colour-scheme that will feature in this summer's make-up collection by Chanel. A vitalised palette that recreates a dream-like summer decor and announces a summer full of joy and tranquillity. Its creator is Peter Philips, Chanel's international director of make-up creation.

Avant-garde nails and lips. A touch of sun on the face

Chanel's nail-polish collection, Le Vernis, lends nails centre stage with spectacular soft pink (Mistral), turquoise (Nouvelle Vague) and bright pink (Riviera) hues.

Rouge Allure, Chanel's most glamorous lipstick, leaves a delicious halo of freedom atop the lips, available in three tones: bright pink (Super), invigorating corral (Genial) and pinkish-peach (Darling).

The Gloss Fluo collection lines the lips with a hint of luminous and audacious, yet transparent, colour. It comes in three tones: neon pink (Laser), golden corral (Pop) and gold-dust pink (Bikini Peach).

Lastly, and for a tanner complexion, the collection turns sublime with Soleil Tan: an ultra-fine, gold-sparkled dust cloud with a tanning effect. If golden-peach highlights are what you're after, you should opt for Terre D'Or, while Terre Halee is perfect for those who want a more amber tone for darker skins.

Chanel products can be purchased in the city's finest perfumeries or in the Corte Inglés in Plaça Catalunya, where the brand also has a Make-Up Studio with exclusive products and colours, along with limited edition products.
